(0-0-7)1. Product and Company Identification 901841 Product Code: Acelepryn 0.067% on TCS Growstar Fertilizer (0-0-7) Product Name: Trade Name: Acelepryn plus fertilizer **Company Name:** Turf Care Supply Corp. **Phone Number:** 50 Pearl Road 1 (330)558-0910 Suite 200 Brunswick, OH 44212 Web site address: www.turfcaresupply.com regaffairs@tcscusa.com Email address: PERS **Emergency Contact:** 1 (800)633-8253 Turf Care Supply Corp. Information: 1 (330)558-0910 2. Hazards Identification Skin Corrosion/Irritation, Category 2 Serious Eye Damage/Eye Irritation, Category 1 Specific Target Organ Toxicity (single exposure), Category 1 Specific Target Organ Toxicity (repeated exposure), Category 1 Aquatic Toxicity (Acute), Category 3 Aquatic Toxicity (Chronic), Category 3 **GHS Signal Word:** Danger GHS Hazard Phrases: Causes skin irritation. Causes serious eye damage. Causes damage to organs Causes damage to organs through prolonged or repeated exposure. Harmful to aquatic life. Harmful to aquatic life with long lasting effects. GHS Precaution Phrases: Obtain special instructions before use. Do not handle until all safety precautions have been read and understood. Do not breathe dust. Wash hands thoroughly after handling. Do not eat, drink or smoke when using this product. Wear appropriate personal protective equipment. **GHS Response Phrases:** IF ON SKIN: Wash with plenty of soap and water. Take off contaminated clothing and wash before re-use. IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. IF exposed: Call a POISON CENTER or doctor/physician. IF exposed or concerned: Get medical attention/advice. Get medical attention/advice if you feel unwell. If skin irritation occurs, get medical advice/attention.

GHS Storage and DisposalDispose of contents/container to an appropriate disposal facility.Phrases:Store in a secure location.Store in a closed container.

	5. Fire Fig	phting Measures	
Flash Pt:	No data.		
Explosive Limits:	LEL: No data.	UEL: No data.	
Autoignition Pt:	No data.		
Suitable Extinguishing Media	Suitable Extinguishing Media:For small fires, use dry chemical, carbon dioxide, or water spray. For large fires, use o chemical, carbon dioxide, alcohol-resistant foam, or water spray.		
Fire Fighting Instructions:	As in any fire, wear a self-contained breathing apparatus in pressure-demand, MSHA/NIOSH (approved or equivalent), and full protective gear. Substance is noncombustible. Decomposes at high temperatures, resulting in toxic and corrosive products. Runoff from fire control or dilution water may cause pollution.		
Flammable Properties and Hazards:	•	of this product are non-combustible. However, a portion of them at elevated temperatures.	
Hazardous Combustion Products:	Thermal decomposition may result in the production of ammonia, formaldehyde, biuret, chlorine, cyanic acid, and cyanide, and oxides of carbon, nitrogen, phosphorus, potassium, sulfur, and chlorine, and oxides of alkaline earth metals, and certain heavier metals used as nutrients in fertilizer products, such as copper, iron, manganese, and zinc, and other toxic and irritating fumes and gases.		
	6. Accidenta	Release Measures	
Steps To Be Taken In Case Material Is Released Or Spilled:	 Spills/Leaks: Vacuum of Avoid generating dusty and ditches which lead except as directed on p in the Protective Equips Personal precautions. Use personal protective adequate ventilation. Environmental precaution Do not let product enter Pick up and arrange disfor disposal. PROCEDURES & PER Exercise appropriate priprevent inhalation of du Methods for cleaning up Sweep up, place in a basiliant 	e equipment. Avoid dust formation. Avoid breathing dust. Ensure ons. • drains. sposal without creating dust. Keep in suitable, closed containers SONAL PRECAUTIONS. ecautions to minimize direct contact with skin or eyes and st.	
		ing and Storage	
Precautions To Be Taken in Handling:	Use with adequate vent contact with eyes, skin,	lation. Minimize dust generation and accumulation. Avoid and clothing. Avoid ingestion and inhalation. Wash thoroughly in a well-ventilated area. Keep container tightly closed. Wash	
	Provide appropriate exh	aust ventilation at places where dust is formed.

Rach, W.G. Cope, L.L. Marking, S.W. Fisher, and H. Dabrowska, 1993
Persistence and Degradability:	Chlorantraniliprole is not readily biodegradable.
Bioaccumulative Potential:	Chlorantraniliprole: Log (Kow) = 2.86 (at pH of 7.0) (DPX-E2Y45: Laboratory study of partition coefficient. E. I. du Pont de Nemours and Company. DuPont Report No. DuPont- 13177. Unpublished.)
Mobility in Soil:	Chlorantraniliprole has medium mobility in soil.
	13. Disposal Considerations
Waste Disposal Method:	If material cannot be completely used according to label directions, dispose of container and contents according to this section.
	Contact a licensed professional waste disposal service to dispose of this material.
	Do not let product enter drains.
	Chemical waste generators must determine whether a discarded chemical is classified as a hazardous waste. US EPA guidelines for the classification determination are listed in 40 CFR Parts 261. Additionally, waste generators must consult state and local hazardous waste regulations to ensure complete and accurate classification.

	PRECAUTIONARY STATEMENTS HAZARDS TO HUMANS AND DOMESTIC ANIMALS
	Caution! Causes moderate eye irritation. Avoid contact with eyes or clothing. Wash thoroughly with soap and water after handling and before eating, drinking, chewing gum or using tobacco.
	ENVIRONMENTAL HAZARDS This pesticide is toxic to aquatic invertebrates, oysters and shrimp. Do not apply directly to water. Drift and runoff may be hazardous to aquatic organisms in water adjacent to use sites.
	Surface Water Advisory: This product may impact surface water quality due to runoff of rain water. This is especially true for poorly draining soils and soils with shallow ground water. This product is classified as having a high potential for reaching surface water via runoff for several months or more after application. A level, well-maintained vegetative buffer strip between areas to which this product is applied and surface water features such as ponds, streams, and springs will reduce the potential loading of chlorantraniliprole from runoff water and sediment. Runoff of this product will be reduced by avoiding applications when rainfall is forecasted to occur within 48 hours.
	Ground Water Advisory: This chemical has properties and characteristics associated with chemicals detected in ground water. This chemical may leach into ground water if used in areas where soils are permeable, particularly where the water table is shallow.
