

KICK

0-1-2

USE INSTRUCTIONS:

Turf Maintenance: Apply 5 to 10 oz. per 1000 sq. ft. in 2 gal. of water every two to four weeks throughout the growing season— preferably in split applications. Kick may be mixed with most fertilizers and pesticides, enhancing the effectiveness of these materials and allowing for a reduction in their rates.

New Seeding: Apply 6 oz. per 1000 sq. ft. in a minimum of 2 gal. of water at time of seeding and again 4 to 6 weeks later. May be used with starter fertilizers.

Sod Installations: After laying sod, thoroughly soak with a dilution of 6 oz. per 1000 sq. ft. in at least 2 gal. of water. Repeat every 6 weeks for first year or two.

Compacted Soils: Use 8 oz. per 1000 sq. ft. in 5 gal. of water. Repeat application in one week. In times of heavy play, repeat this application process every 60 days.

Tree Soil Injection: Add 1 quart per 100 gal. to cover 3000 sq. ft. of root area and apply every 60 days. For stressed and damaged trees, reduce coverage to 1500 sq. ft. root area.

In Virginia, this lawn/turf fertilizer contains phosphorus and is only for nonagricultural use on (i) turf during its first growing season, (ii) on turf areas being repaired or renovated, and (iii) on turf where a soil test performed within the last 3 years indicates a phosphorus deficiency. This fertilizer is not for the routine maintenance of turf.

DO NOT APPLY NEAR WATER, STORM DRAINS, OR DRAINAGE DITCHES. DO NOT APPLY IF HEAVY RAIN IS EXPECTED. APPLY THIS PRODUCT ONLY TO YOUR LAWN/GARDEN, AND SWEEP ANY PRODUCT THAT LANDS ON THE DRIVEWAY, SIDEWALK, OR STREET, BACK ONTO YOUR LAWN/GARDEN.

Landscaping Maintenance: Drench soil with 4 oz. in 2 gal. of water every 60 days. Avoid mixing with excessive phosphorus or sulfur containing materials. Always perform a bench test for compatibility.

GUARANTEED ANALYSIS:

Available Phosphate (P₂O₅)1.00%
Soluble Potash (K₂O) 2.00%

Ingredients: Molasses, Kelp, Phosphoric Acid

ALSO CONTAINS NON-PLANT FOOD INGREDIENTS:

Humic Acids
